

STYLE GUIDE

When assessing afro hair textures for style options, keep in mind that it is best to use rollers or twist patterns that are closer to the natural size of the individual's dominant curl texture.

We have noticed society becoming more accepting of Black women wearing their natural curly textures. It is no longer a surprise to see Black women in television commercials, movies, high profile community or work positions wearing full and lustrous afro-textured tresses. These images have inspired many to let go of the chemical straightening processes and give their natural curls a try.....D. Peace - Master Stylist
